Many businesses nowadays take advantage of the benefits offered by using an Enterprise Resource Planning (ERP). They used to manage daily business activities such as accounting, procurement, project management, risk management, compliance, and supply chain operations. EQM (Enterprise Quality Management) is a business consulting firm that offers business solutions that improve a company's management, processes, productivity and profitability.

EQM offers Microsoft Dynamics AX (Axapta), possibly the most technologically advanced tool on the market. Microsoft Dynamics AX (Axapta) gives you up-to-the-second information on company changes and trends while performing general management tasks. It also makes it easy to access and update any company data and create access to certain data on staff, customers, and suppliers-all without losing your own customisations.

If your company has offices in several countries or does business around the world, Microsoft Dynamics AX (Axapta) allows you to detect and harness new business opportunities. These features mean you can lead and manage your company, SME, or business in an easy and intuitive way, saving time and boosting productivity.

Summary

The benefits that this software provide you with can be summed up:

- EASE OF USE: Familiar interface, similar to other tools you already use.
- ADAPTABILITY: Quick and dynamic adaptation to market changes.
- GREATER CONTROL: Coordinate all business processes and receive built-in information.
- PRODUCTIVITY: Time savings in automating processes that reduce operating costs and errors.
- SPEED: Manage different locations and countries. It is multi-company, multi-currency and multi-language.
- FLEXIBILITY: Increased growth possibilities by adapting to the needs of your business.
- INTEGRATION: With the rest of your Microsoft applications and our custom plugins.
- VISIBILITY: Unique approach when leveraging services in the cloud.

“For most companies, the benefits of ERP systems often outweigh the disadvantages. The potential for totally streamlined business functions and boosts in productivity over the long term makes the benefits of implementing ERP systems a worthwhile investment of time and resources.”

There are three main reasons why companies choose to implement an ERP system into their organization: (1) To integrate financial data - An ERP system creates a single version of the truth to align everyone in the company in terms of costs and revenues. (2) To standardize manufacturing processes - An ERP system ensures that different units are using the same business processes to save time and increase productivity. (3) To standardize HR information - An ERP system can help large companies have a standard way of tracking employee time and share benefits and services offered.

Developing a continuous improvement plan helps you maximize the value of your ERP system over time and increase the return on your investment. ”

PRONTO is a project funded by the Erasmus+ programme. PRONTO incorporates best practice project management enabling micro and small businesses to plan and implement high impact business improvement projects.
